## PREFACE

This report presents statistics on the number of inhabitants of the State, its counties, and minor civil divisions (townships, etc.). In addition, separate figures are also presented for urban places, wards of cities of 5,000 or more, and other areas of the State. These data are based upon tabulations from the Seventeenth Decennial Census of the population of the United States, its Territories, and possessions conducted as of April 1, 1950. Provision for the Seventeenth Decennial Census was made in the act providing for the Fifteenth and subsequent decennial censuses which was approved on June 18, 1929.

The major portion of the information compiled from the Census of Population of 1950 will appear in Volume I, *Number of Inhabitants*, and in Volume II, *Characteristics of the Population*. This report is a preprint of Chapter 17 (Kentucky) of Volume I, which is to present, in a single publication, statistics on the number of inhabitants for each State.

The materials presented here will also appear as Chapter A of Part 17 (Kentucky) of Volume II. Volume II will comprise a series of separately published parts, one for each State and a summary for the United States. The use of separate parts makes the basic materials on characteristics of the population for a given State available to the public in a single publication. Within the part for a State, Chapter A will recapitulate the statistics on the number and distribution of the population within a State; Chapter B will present statistics on the general characteristics of the population of the various political subdivisions of the State, such as counties, incorporated places, and the like; and Chapter C will present data on the detailed characteristics of the population of the larger areas within the State, such as cities of 100,000 inhabitants or more and standard metropolitan areas.

The materials presented here were prepared under the supervision of Howard G. Brunsman, Chief, Population and Housing Division, and Dr. Henry S. Shryock, Jr., Assistant Chief for Population Statistics, by Dr. Henry D. Sheldon, Chief, Demographic Statistics Section, and Charles P. Brinkman, Chief, Population Distribution Unit; the compilation of the statistics was under the direction of Robert B. Voight, Assistant Chief for Operations. The collection of the information on which these statistics are based was under the supervision of Lowell T. Galt, Chief, Field Division. The geographic work, including the delineation of special types of urban territory and the preparation of maps, was under the supervision of Clarence E. Batschelet, Chief, Geography Division.

- I Number of Inhabitants
- II Characteristics of the Population

Succeeding volumes will cover the following subjects:

Census Tracts, Nativity and Parentage, Nonwhite Population by Race, Persons of Spanish Surname, Institutional Population, Differential Fertility, Labor Force Characteristics, Occupation, Industry, Income, Internal Migration, Education, Characteristics of Families and Households.

## U. S. CENSUS OF HOUSING: 1950

### Volume

- I General Characteristics
- II Nonfarm Housing Characteristics
- III Farm Housing Characteristics
- IV Residential Financing
- V Block Statistics

Housing statistics for census tracts are to be included in the Population reports on census tracts.

# KENTUCKY

## Number of Inhabitants

**The State.**—Kentucky, originally a part of Virginia, was admitted to the Union in 1792 as the fifteenth State with boundaries substantially as at present. The population of Kentucky on April 1, 1950, according to the Seventeenth Census was 2,944,806. The State has a land area of 39,864 square miles. In 1950 there was an average of 73.9 inhabitants per square mile compared with an average of 70.9 in 1940. Among the States, Kentucky ranked nineteenth in population and thirty-sixth in land area.

In 1790 the area which two years later became the State of Kentucky had a population of 73,677 (table 1). In 1950, 160 years later, the population of the State was about 40 times as large. Except for the decades from 1790 to 1830, the intercensal rates of growth for Kentucky have been below those for the Nation as a whole. The most rapid rate of growth and the largest numerical increase in the first half of the twentieth century was experienced between 1930 and 1940, when the gain was 231,038, or 8.8 percent. The increase of 99,179 between 1940 and 1950 represented a gain of 3.5 percent over the 2,845,627 persons enumerated in 1940. The rate of gain for the decade was the lowest in the history of the State, and the numerical increase was the lowest since that for the decade 1830 to 1840.

**Usual place of residence.**—According to usual Census practice, which dates back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, these different bases of classification would be identical.

In the application of this rule, persons were not always counted as residents of the places in which they happened to be found by the census enumerators. Persons in places where guests usually pay for quarters (hotels, etc.) were enumerated on the night of April 11, and those whose usual place of residence was elsewhere were allocated to their homes. Visitors found staying in private homes, however, were not ordinarily interviewed there. Information on persons away from their usual place of residence was obtained from other members of their families, landlords, etc. If an entire family was expected to be away during the whole period of the enumeration, information on it was obtained from neighbors. A matching process was used to eliminate duplicate reports for persons who reported for themselves while away and were also reported by their families at home.

Persons in the armed forces quartered on military installations were enumerated as residents of the States, counties, and minor civil divisions in which their installations were located. Members of their families were enumerated where they actually resided. In the 1950 Census, college students living away from home were considered residents of the communities in which they were residing while attending college, rather than as persons temporarily absent from their parental homes as was the practice in 1940. In 1950 the crews of vessels of the American Merchant Marine in harbors of the United States were counted as part of the popula-

tion of the ports in which their vessels were berthed on April 1, 1950. In 1940 such persons were treated as part of the population of the port from which the vessel operated. Inmates of institutions, who ordinarily live there for long periods of time, were counted as inhabitants of the place in which the institution was located; whereas patients in general hospitals, who ordinarily have short stays, were counted at, or allocated to, their homes. All persons without a usual place of residence were counted where they were enumerated.

**Urban and rural population.**—The 1950 urban population of Kentucky comprised 1,084,070 persons, or 36.8 percent of the population of the State (table 1). The urban population was living in the 74 urban places in the State and in other territory in the Kentucky parts of the urban-fringe areas of the Cincinnati, Ohio, Huntington (W. Va.)—Ashland (Ky.), and Louisville, Ky., Urbanized Areas (table 2).

The rural population of Kentucky numbered 1,860,736, or 63.2 percent of the population of the State (table 1). Of the rural population, 155,316, or 8.3 percent, were living in the 73 incorporated and 31 unincorporated places of 1,000 to 2,500 inhabitants (table 2).

**Urban definition.**—Under the urban definition established for use in the 1950 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, towns,<sup>1</sup> and villages; (b) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more; and (c) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural. According to the urban definition used in previous censuses, the urban population comprises all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under special rules relating to population size and density.

In both definitions, the most important component of the urban territory is the group of incorporated places having 2,500 inhabitants or more. A definition of urban territory restricted to such places, however, would exclude a number of equally large and densely settled places, merely because they were not incorporated places. Under the old definition, an effort was made to avoid some of the more obvious omissions by the inclusion of the places urban under special rules. Even with these rules, however, many large and closely built-up places were excluded from the urban territory. To improve the situation in the 1950 Census, the Bureau of the Census set up, in advance of enumeration, boundaries for urban-fringe areas around cities of 50,000 or more and for unincorporated places outside urban fringes. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the 1950 definition. (Of course, the incorporated places of 2,500 or more are urban in their own right.) Consequently, the special rules of the old definition are no longer necessary.

<sup>1</sup> Except in New England, New York, and Wisconsin, where "towns" are minor civil divisions of counties and are not necessarily densely settled centers like the towns in other States.

According to the new urban definition, the 1950 urban population of Kentucky included the following components: (1) The 985,739 inhabitants of the 68 incorporated places of 2,500 inhabitants or more; (2) the 31,149 inhabitants of the 6 specially delineated unincorporated places of 2,500 inhabitants or more; and (3) the 67,182 persons living in other territory included in the Kentucky parts of the Cincinnati, Ohio, Huntington (W. Va.)—Ashland (Ky.), and Louisville, Ky., Urbanized Areas. As there were no places urban under special rule in Kentucky according to the old definition, the first element comprised the urban population under the old definition. The population of the remaining elements—98,331—represents the gain in urban population of Kentucky which resulted from the change in definition.

Although the Bureau of the Census has employed other definitions in the course of its history, the statistics on the population by urban and rural residence for the years 1790 to 1940 are shown in accordance with the 1940 definition. The 1950 statistics are shown in accordance with both the new and old definitions.

**Trends of urban and rural population.**—Trends in the urban and rural population can be examined only on the basis of the old definition. On this basis, the urban population of Kentucky rose from 467,668 in 1900 to 985,739 in 1950 (table 1). The most rapid rate of growth and the greatest numerical increase in the urban population in the twentieth century occurred between 1920 and 1930. The increase of 136,412 between 1940 and 1950 represented a gain of 16.1 percent over the 1940 figure of 849,327. Thirteen of the 15 cities of 10,000 inhabitants or more shared in the growth of the urban population between 1940 and 1950, with the rates of gain ranging from 1.3 percent for Newport to 40.0 percent for Richmond. The rates of decline in the two cities which lost population were moderate, 1.5 percent for Fort Thomas and 2.8 percent for Paducah. The number of cities of 10,000 inhabitants or more increased from 7 to 15 between 1900 and 1950, and the number of persons living in cities of this size rose from 345,246 to 724,147 (table 3). The proportion of the population living in urban territory increased from 21.8 to 33.5 percent between 1900 and 1950.

The rural population of Kentucky increased from 1,679,506 in 1900 to 1,996,300 in 1940 (table 1). The first decline in the rural population of the State came between 1940 and 1950, when a decrease of 37,233, or 1.9 percent, brought the rural population to 1,959,067. Both the largest numerical increase and the most rapid rate of growth in the rural population in the twentieth century occurred in the decade 1930 to 1940. The proportion of the population of Kentucky living in rural territory declined from 78.2 percent in 1900 to 66.5 percent in 1950.

**Counties.**—The 120 counties in Kentucky ranged in size from Robertson with a population of 2,881 to Jefferson with a population of 484,615. Between 1940 and 1950, 42 of the counties in Kentucky increased in population. Of the 42 counties which gained population, 38 had had gains in the previous decade. The most rapid rate of growth was experienced by Hardin County, which gained at the rate of 72.8 percent. The largest numerical increase—99,223—was recorded in Jefferson County. Jefferson County also had had the largest numerical increase in the previous decade.

**Minor civil divisions.**—To the primary political divisions into which counties are divided, the Bureau of the Census applies the general term "minor civil divisions." The primary divisions of the counties in Kentucky are called magisterial districts. The incorporated cities and towns form subdivisions of the minor civil divisions in which they are located.

Table 6 shows statistics on the population of each county by minor civil divisions for the last three censuses. The population of each incorporated and unincorporated place is shown in *italics* under the population of the minor civil division in which it is located. When an incorporated or unincorporated place lies in two or more minor civil divisions, the population of the several

parts is shown in table 6 in the appropriate counties and minor civil divisions, and each part is designated by "part." Figures on the total population of such places are given in table 7. Unincorporated places are designated by "uninc." Changes between the 1940 and 1950 Censuses in the boundaries of the areas listed are shown in notes to table 6. For changes in boundaries prior to the 1940 Census, see reports of the Sixteenth Census (1940), *Population*, Vol. I, pp. 419-424, and reports of earlier censuses.

**Incorporated and unincorporated places.**—In 1950 Kentucky had 333 places incorporated as cities or towns and 37 unincorporated places of 1,000 inhabitants or more. There were 1,194,107 persons living in the incorporated places, 208,368 of whom were in the 265 places with fewer than 2,500 inhabitants. Of the 74,352 persons in the unincorporated places, 43,203 were in the 31 places with fewer than 2,500 inhabitants. The incorporated places ranged in size from Caseyville town with a population of 73 to Louisville city with a population of 369,129.

Political units recognized as incorporated places in the 1950 Census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

The Bureau of the Census has delineated boundaries for the thickly settled urban fringe around cities of 50,000 or more and has also delineated boundaries for unincorporated places of 1,000 or more which are densely settled population centers without corporate limits. Although there are unincorporated places within the urban fringe, it was not feasible to establish boundaries for such places and therefore they are not identified as separate places.

The count of urban places in the 1950 Census comprises all incorporated places of 2,500 or more regardless of location and unincorporated places of 2,500 or more which are located outside the urban-fringe areas. Incorporated places of less than 2,500 which lie in the urban fringe are not recognized as urban places.

**Urbanized areas.**—There were three urbanized areas partly within Kentucky. The Kentucky parts of the Cincinnati, Ohio, Huntington (W. Va.)—Ashland (Ky.), and Louisville, Ky., Urbanized Areas had 146,490, 42,995, and 419,183 inhabitants, respectively. Of the 608,668 persons in Kentucky living in these urbanized areas, 400,260 were in two central cities, Louisville and Ashland, and 208,408 were in the urban-fringe areas. Of the persons in the urban-fringe areas, 161,822 were living in 32 incorporated places and 46,586 in the unincorporated parts (tables 2 and 9).

Each urbanized area contains at least one city with 50,000 inhabitants or more in 1940 or according to a special census taken since 1940, and some urbanized areas contain two or more cities of 50,000. Each urbanized area also includes the surrounding closely settled incorporated places and unincorporated areas that meet the criteria listed in the section below on "Urban fringe." Thus, the territory of an urbanized area may be classified into incorporated parts and unincorporated parts. (See urbanized area maps.)

An urbanized area also may be divided into central city or cities and urban fringe as defined below.

**Central cities.**—Although an urbanized area may contain more than one city of 50,000 or more, not all cities of this size are necessarily central cities. The largest city of an area is always a central city. In addition, the second and third most populous cities in the area may qualify as central cities provided they have a population of at least one-third of that of the largest city in the area and a minimum of 25,000 inhabitants. The names of the individual urbanized areas indicate the central cities of the areas.

**Urban fringe.**—The urban fringe includes that part of the urbanized area which is outside the central city or cities. The

following types of areas are embraced if they are contiguous to the central city or cities or if they are contiguous to any area already included in the urban fringe:

1. Incorporated places with 2,500 inhabitants or more in 1940 or at a subsequent special census conducted prior to 1950.

2. Incorporated places with fewer than 2,500 inhabitants containing an area with a concentration of 100 dwelling units or more with a density in this concentration of 500 units or more per square mile. This density represents approximately 2,000 persons per square mile and normally is the minimum found associated with a closely spaced street pattern.

3. Unincorporated territory with at least 500 dwelling units per square mile.

4. Territory devoted to commercial, industrial, transportation, recreational, and other purposes functionally related to the central city.

Also included are outlying noncontiguous areas with the required dwelling unit density located within  $1\frac{1}{2}$  miles of the main contiguous urbanized part, measured along the shortest connecting highway, and other outlying areas within one-half mile of such noncontiguous areas which meet the minimum residential density rule

<sup>1</sup> According to the new urban definition, the urban population comprises persons residing in urban territory but not necessarily in an urban place, which is defined as an incorporated place of 2,500 or more, or an unincorporated place of 2,500 or more located outside an urbanized area. Under the old definition, incorporated places of 2,500 or more and places urban under special rule are classified as urban places. There were no places urban under special rule in Kentucky.

\* Includes 67,182 persons in urban territory outside of urban places.

\* Population of that part of Virginia taken to form Kentucky in 1792.

Table 6.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1930 TO 1950

["Uninc." designates an unincorporated place. "Districts" shown here are magisterial districts. Figures for 1930 and 1940 are not available for unincorporated places and places incorporated subsequent to Apr. 1, 1940. Minor civil division figures for 1940 and 1950 do not necessarily add to county totals. Boundary changes between 1940 and 1950 given in footnotes; for changes between 1930 and 1940, see reports of 16th Census (1940), *Population*, Vol. I, pp. 410-424. Total population of a place located in 2 or more minor civil divisions appears on table 7]

Table 7.—POPULATION OF ALL INCORPORATED PLACES AND OF UNINCORPORATED PLACES OF 1,000 OR MORE: 1950 AND 1940

[“Uninc.” designates an unincorporated place. Figures for 1940 not available for unincorporated places and places incorporated subsequent to Apr. 1, 1940. Asterisk (\*) denotes an incorporated place under 2,500 located in an urbanized area. Specific unincorporated places inside urbanized areas not separately identified and therefore not listed in this table. For 1930 population of incorporated places, see table 6.]

## LOUISVILLE URBANIZED AREA MAP

The Louisville Urbanized Area, for which statistics are shown in table 9, is depicted in the following map. The shaded areas, in combination, comprise the urbanized area. To assist in locating the exact external boundaries of the area, each boundary feature (street segment, political boundary, or other) has been assigned a number. The boundary segments thus numbered are shown on the map and the features to which they apply are presented in the following key.
